Hi, this is Dan. I have 8 years of work experience (4 years front-end + 4 Years Back-end). My strong capabilities with creating visually stunning responsive web pages and interfaces make me a valuable team member. I have a strong detail focus and excellent time management skills, allowing for fast completion of web site projects. I'm certain you will be impressed by the skills I can offer as a Full Stack Web Developer.

2019-11present

Web developer (Freelancer)
Dance2go, Auckland

Wordpress, Woocommerce

The business owner plans to migrate his website from ASP to Woocommerce. The corporation between the business owner and the previous developers is quite bad. They spent Two years setting up the website but they failed. I went through everything and gave my professional advice to my client. Our successful communication and corporation push the website online quite soon.

2019-10 Web Developer (Volunteer) present

Vision For Humanity, Auckland

Wordpress

Working as a volunteer to advise and re-develop the whole website using Wordpress. I am the only developer and responsible for everything, including setting up the environment, design, and development.

Old Website: http://www.vfh.org.nz/

New Website: http://www.vfh.org.nz/vfh-newsite

2012-08 -**Application Developer** 2018-08 IBM, Dalian China

> JS, Html, Css, Dojo (03/2013-2015) JS, Html, Css, JQuery, Backbone, Grunt, Node.js, Scss (2015-2018)

I experienced several projects in IBM. The longest one I have been working on is IBM W3 homepage redesign, which took 4 years. As one of the three core frontend developers, I developed many features and achieved high satisfaction from clients. I also developed several mini-applications, likes chatbot based on IBM Watson API and Nodejs, backend development for a Wechat Mini program based on Java and DB2 and so on. Before I left IBM, I worked as the project manager to rebuild a legacy project.

2010-11 -Java Developer 2012-08 iSoftstone, Dalian China

Java, Spring, Mybatis, Camel, Oracle

I was assigned to British Telecommunication Dalian working as a Java developer. Six months later, I was promoted to be the team leader, because of my responsible attitude towards the work. Functionality development based on the requirement Reporting team's work status to manager Functional testing

2009-10 -Junior Web Developer 2010-11 Neusoft, Dalian China

Java, Spring, Ibatis, JSP, Oracle

This is an internal project called "Task Management System" which tracks staff daily work. It involves planning, tracking, and reporting. I wrote JSP, Servlets, and SQL to add functionality. My database skills improved a lot in this project because I wrote hundreds of SQL.

2018-08 -Eastern Institute of Technology, Auckland 2019-08 Postgraduate of Diploma, Information Technology
