OBJECTIVE

I'm looking for full-time work in the role of Web developer.

PERSONAL STATEMENT

Hi, this is Dan. I have 9 years work experience (4 years front-end + 4 Years Back-end). My strong capabilities with creating visually stunning responsive web pages and interfaces make me a valuable team member. I have a strong detail focus and excellent time management skills, allowing for fast completion of web site projects. I'm certain you will be impressed by the skills I can offer as a Full Stack Web Developer.
4 years+ experience in JS, HTML, CSS3
2 years+ experience in JQuery, Backbone, Nodejs, Grunt, Dojo
3 years+ experience in JAVA, Struts, Spring, Hibernate, SQL
Hands-on Reactjs experience but less than 1 year

See my web site to find more project information http://www.zhouxiaoxu.com

WORK HISTORY

RocketShp
Auckland, New Zealand
Jul 2019 - Jul 2019

Web Developer

Wordpress, Siteground, Responsive
This is my first practice in New Zealand which happened during the break of my study. I developed a responsive website for Rocketshp's client.

- As the only developer, I am responsible for almost everything, including domain/DNS configuration, environment set-up, page development, and speed optimization.

IBM
Dalian, China
Apr 2018 - May 2018

Application Developer

Java, Spring, DB2, Jersey
IBM "荟专享" is built on Wechat Mini Program Platform. I am the only backend developer who is responsible for the Restful APIs development using Java and DB2.

- Back-end development
- DB Design
- Deployment
- Functional testing

IBM
Dalian, China
Jul 2013 - Feb 2018

Web Developer

JS, Html, Css, Dojo (03/2013-2015)
JS, Html, Css, JQuery, Backbone, Grunt, Node.js, Scss (2015-2018)
IBM w3 is an internal website integrated with many features like News, Media, E-learning, Polls and so on. As one of the three main developers, I am responsible for developing redesigned visual pages, integrating different features through provided APIs and customizing search results.

- Front-end development based on sponsors' requirement
- The integration testing and issue fixing.
- Daily reporting to the manager in scrum meeting.
- The maintenance of back-end proxy server.

iSoftstone
Dalian, Chine
Nov 2010 - Aug 2012

Java developer

Java, Spring, Camel, Oracle
I was assigned to British Telecommunication Dalian working as a Java developer. Six months later, I was promoted to be the team leader, because of my responsible attitude towards the work.

- Functionality development based on the requirement
- Reporting team's work status to manager
- Functional testing

Neusoft

Dalian, China
Oct 2009 - Nov 2011

● **Junior Java Developer**

Java, Spring, Ibatis, JSP, Oracle
This is also an internal project called "Task Management System" which tracks staff daily work. It involves planning, tracking, and reporting. I wrote JSP, Servlets, and SQL to add functionality. My database skills improved a lot in this project because I wrote hundreds of SQL.

- Web page creation using Jsp.
- Designed and implemented data storage solutions
- Functional testing

QUALIFICATIONS

Eastern Institute of Technology

Auckland, New Zealand
2019

● **Postgraduate Diploma in IT**

TECHNICAL SKILLS

- Javascript, HTML, CSS
- Java, Database
- Linux, Git, Grunt, Jira, Jenkins

- JQuery, BackboneJs, ReactJs, NodeJs
- Spring, Hibernate, Jersey

INTERESTS

- I enjoy the coding life.
